MOST SUSTAINABLE VET IN THE NETHERLANDS!

Dominique Majoor, lid CvB:

"We continue to challenge ourselves to take steps in the field of sustainable innovations. We do this together with our students, staff and partners in the region."

"And that is certainly not only about making our buildings more sustainable, but also about embedding sustainability in education. We teach our students that there is only one future, and that is sustainable."

Promising

Aware

Connecting

Sustainability is about much more than solar panels and paper straws. It also means working on safety, health and ensuring that everyone can participate. It is the sum of a fair economy, equal opportunities and a livable earth. The Global Goals work as a compass for us. We use them to develop even better training and to find rock-solid collaborations. So that our students make a difference with their craftsmanship and practical ideas
